

Alger 35 ETF

1st Quarter 2024 As of March 31, 2024

ATFV

This ETF is different from traditional ETFs.

Traditional ETFs tell the public what assets they hold each day. This ETF will not. This may **create additional risks** for your investment. Specifically:

- You may have to pay more money to trade the ETF's shares. This ETF will provide less information to traders, who tend to charge more for trades when they have less information.
- The price you pay to buy ETF shares on an exchange may not match the value of the ETF's portfolio. The same is true when you sell shares. These price differences may be greater for this ETF compared to other ETFs because it provides less information to traders.
- These additional risks may be even greater in bad or uncertain market conditions.

The differences between this ETF and other ETFs may also have advantages. By keeping certain information about the ETF confidential, this ETF may face less risk that other traders can predict or copy its investment strategy. This may improve the ETF's performance. If other traders are able to copy or predict the ETF's investment strategy, however, this may hurt the ETF's performance. For additional information regarding the unique attributes and risks of this ETF, please refer to the prospectus.

Philosophy

Alger has been committed to a growth style of investing since the firm was founded in 1964. We believe that the best way to uncover and evaluate such companies is through intensive, fundamental, proprietary investment research. At Alger, we believe companies undergoing **Positive Dynamic Change** offer the best investment opportunities. By Positive Dynamic Change, we mean those companies experiencing High Unit Volume Growth and Positive Life Cycle Change.

Fred Alger Management, LLC has contractually agreed to waive and/or reimburse expenses (excluding custody fees, acquired fund fees and expenses, taxes, brokerage and extraordinary expenses, to the extent applicable) through April 30, 2025 to the extent necessary to limit other expenses of the Fund to 0.10% of the Fund's average daily net assets. This expense reimbursement may only be amended or terminated prior to its expiration date by agreement between Fred Alger Management, LLC and the Fund's Board of Trustees, and will terminate automatically in the event of termination of the Investment Management Agreement. Fred Alger Management, LLC may recoup any fees waived or expenses reimbursed pursuant to the contract; however, the Fund will only make repayments to Fred Alger Management, LLC if such repayment does not cause the Fund's expense ratio after the repayment is taken into account, to exceed both (i) the expense cap in place at the time such amounts were waived or reimbursed, and (ii) the Fund's current expense cap. Such recoupment is limited to two years from the date the amount is initially waived or reimbursed.

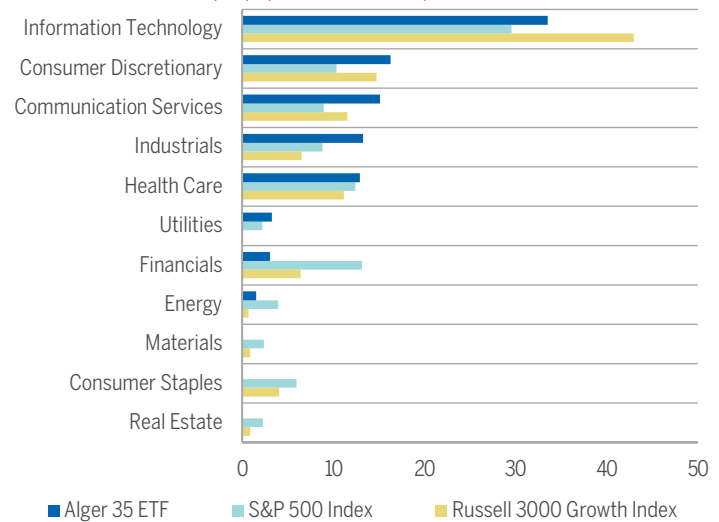

Performance data quoted represents past performance and is no guarantee of future results. DUE TO MARKET VOLATILITY, CURRENT PERFORMANCE MAY BE DIFFERENT THAN THE FIGURES SHOWN. Investment return and principal value will fluctuate so that an investor's shares, when sold in the secondary market, may be worth more or less than original cost. Returns less than one year are not annualized. Performance does not reflect the deduction of commissions, which a broker may charge to execute a transaction in Fund shares, and an investor may incur the cost of the spread between the price at which a dealer will buy shares and the price at which a dealer will sell shares. Market performance is determined using the official closing price on the New York Stock Exchange. Market performance does not represent the returns you would receive if you traded shares at other times. To obtain performance data current to the most recent month end, please visit www.alger.com. Index performance does not represent the fund's performance. Investors may not invest directly in an index.

The Fund is an actively managed ETF that does not seek to replicate the performance of a specified index. The Fund does not provide daily disclosure of its portfolio holdings, but instead provides a verified intraday indicative value ("VIIV") calculated and disseminated every second throughout the trading day. The VIIV is designed to be a highly correlated per share value of the underlying portfolio, but there is a risk that market price of the Fund may vary significantly from its NAV. The VIIV Calculation Methodology and a historical daily comparison of the Fund's VIIV to its NAV is available on www.alger.com. The Fund trading on the basis of a VIIV may trade at a wider bid/ask spread than ETFs that publish their portfolios on a daily basis, especially during periods of market disruption or volatility, and, therefore, may cost investors more to trade. Although the Fund seeks to benefit from keeping its portfolio information confidential, market participants may attempt to identify a Fund's trading strategy, which, if successful, could result in such market participants engaging in certain predatory trading practices that may have the potential to harm the Fund and its shareholders. The Fund's shares trade in the secondary market on NYSE Arca, Inc. and therefore may experience associated risks, such as the potential lack of an active market for Fund shares, losses from trading in secondary markets, periods of high volatility, and disruptions in the creation and/or redemption process of the Fund. Any of these factors may cause the Fund's shares to trade at a premium or discount to NAV. Creations and redemptions in the Fund occur through an agent called an "AP Representative" who is not obligated to engage in creations or redemptions. The Fund may have a limited number of AP Representatives and if AP Representatives are not able to proceed with creations and/or redemptions the Fund's shares may trade at a discount to NAV and possibly face trading halts and/or delisting, and investors could experience significant losses as a result. This material is not meant to provide investment advice and should not be considered a recommendation to purchase or sell securities.

Risk Disclosures - Investing in the stock market involves risks, including the potential loss of principal. Growth stocks may be more volatile than other stocks as their prices tend to be higher in relation to their companies' earnings and may be more sensitive to market, political, and economic developments. Local, regional or global events such as environmental or natural disasters, war, terrorism, pandemics, outbreaks of infectious diseases and similar public health threats, recessions, or other events could have a significant impact on investments. A significant portion of assets may be invested in securities of companies in related sectors, and may be similarly affected by economic, political, or market events and conditions and may be more vulnerable to unfavorable sector developments. Investing in companies of small and medium capitalizations involves the risk that such issuers may have limited product lines or financial resources, lack management depth, or have limited liquidity. The Fund is classified as a "non-diversified fund" under federal securities laws because it can invest in fewer individual companies than a diversified fund. Assets may be focused in a small number of holdings, making them susceptible to risks associated with a single economic, political or regulatory event than a more diversified portfolio. Active trading may increase transaction costs, brokerage commissions, and taxes, which can lower the return on investment. At times, cash may be a larger position in the portfolio and may underperform relative to equity securities.

Alger pays compensation to third party marketers to sell various strategies to prospective investors. Market capitalization and sector allocation are inclusive of cash but cash is not displayed in the chart. Top holdings are inclusive of cash but cash is not displayed as a top holding.

Active Share is a measure of the percentage of stock holdings in a portfolio that differs from the benchmark index. The calculation is inclusive of cash. Characteristics are sourced from FactSet, an independent source, using all available data. Fred Alger Management, LLC, makes no representation that FactSet is complete, reliable, or accurate. With the exception of active share, the calculation excludes cash. Equity Holdings for the referenced product represents individual securities held, excluding private placements, private equity, rights, warrants, options, other derivatives, cash or cash equivalents and securities where the total market value in the portfolio is less than one dollar. A list of all holdings can be found at www.alger.com for the applicable fund or composite. P/E Ratios were calculated using a weighted harmonic average, excluding companies with negative earnings. Sales Growth and EPS Growth rates were calculated using a weighted median. **Earnings per share (EPS)** is the portion of a company's earnings or profit allocated to each share of common stock. **Sales Growth** is a measure of the estimated sales growth rate of a company over the next 12-months.
