“
The biggest thing
I look for in
people I work with
is a passion for investing.
It has to be something
you truly enjoy.
”
PATRICK KELLY, CFA
“
I use my science and
engineering background
every day. I’ve been trained
to look for patterns, which
helps me understand and
synthesize information and
navigate the complexities of
portfolio management.
”
DR. ANKUR CRAWFORD

Portfolio Managers Patrick Kelly and Ankur Crawford have spent more than 22 years identifying, analyzing, and investing in change. They have honed their investing skills by climbing through the analyst ranks and becoming portfolio managers for Alger's large cap strategies. Today, this dynamic duo manages more than $42 billion of assets for a wide array of retail, institutional, and retirement clients.

In the pages that follow, we share Patrick and Ankur's journeys to becoming part of our investing team and you can read about their backgrounds, accomplishments, and proficiencies. This is your opportunity to get to know Patrick and Ankur on a personal level and learn about their drive for investment excellence.

A Passion for Investing

Patrick Kelly has always had an affinity for sports. He played tennis, basketball, and soccer in high school and went on to play soccer at Georgetown University. He successfully relates sports to investment management and strongly believes in an effective process and teamwork; after all, all great teams need to relentlessly focus on constant improvement.

Patrick's path to investment management started when an older brother introduced him to the stock market. After graduating with a degree in finance and having had a taste of investing by managing a portion of Georgetown University's student investment fund while in college, Patrick had a brief stint in investment banking before joining Alger in 2000. 26 years later, Patrick continues to bring the team mindset to investing where he co-manages the firm's large cap strategies.

PATRICK KELLY, CFA

> **"If you have a good process and good discipline, the score will take care of itself."**

As Patrick likes to remind his colleagues, this is a competitive business and you need a competitive spirit and fire to be successful. In his role as a "coach," Patrick helps his team understand that "if you have a good process and good discipline, the score will take care of itself." This is a teaching that he believes can be applied equally to investment management and sports teams.

Patrick's experience investing in technology companies over the years has taught him valuable lessons. For instance, what may be a great technology company today may not be a great technology company five or 10 years from now.

Patrick firmly believes we are in the early days of one of the most innovative times in history given the advancements in artificial intelligence and launched the **Alger AI Enablers & Adopters ETF** in early 2024 to capitalize on this opportunity. The ETF offers investors access to the "enablers" of AI, which are those companies, developing the building block components for AI infrastructure, as well as the "adopters", which are those companies successfully integrating AI technologies into their businesses to enhance their products or services or make their operations more productive.

Patrick believes AI will create winners and losers across sectors, and that companies that are well positioned to benefit and leverage AI could outperform the market over the long term.

A Quest for Learning

Dr. Ankur Crawford succeeded at becoming a scientist, engineer, and patent holder, but her innate curiosity to learn led her to finance. 22 years later, she is now a leading portfolio manager at Alger, guiding investments in the firm's large cap growth portfolios.

In her quest for learning, Ankur responded to an Alger job board posting at Stanford University, where she was completing her doctorate in mechanical engineering and materials science. Despite not having a background in investing, she was offered a position on the spot as Alger's CEO and CIO Dan Chung was impressed by her ability to have an academic debate. Since joining Alger in 2004, Ankur has risen up the ranks from analyst to head of technology sector to portfolio manager, where she co-manages the firm's large cap strategies, including Alger Focus Equity Fund.

Ankur spends her days posing a steady stream of questions to her portfolio companies' management teams and her colleagues to gain valuable insights as she constructs portfolios. She enjoys teaching and mentoring young associates, taking pride in their growth and development.

Ankur and the team's research on innovation and growth has led to significant investments in leading semiconductor, technology, and energy companies. This proved to be a powerful combination, as the **Alger Focus Equity Fund** was named a 2026 IBD Best Mutual Funds award winner by Investor's Business Daily and earned a LSEG Lipper Fund Award. Of course, the overweight investments in artificial intelligence (AI) leads to a natural question: is AI overblown? Not according to Ankur.

Unwilling to rest on her laurels, Ankur launched the **Alger Concentrated Equity ETF** in early 2024. The idea behind it was to offer a more concentrated, focused version of the firm's large cap portfolios where she could take larger positions when her conviction was high. It also enables her to be nimble and invest opportunistically to take advantage of current market opportunities across all sectors.

Where will the team's research take Ankur and her portfolios next? She believes AI is going to change the investment landscape as AI unlocks new pathways for creativity and innovation, transforming the way we work, collaborate, and live.

DR. ANKUR CRAWFORD

"When software writes software, innovation becomes exponential."

Alger Focus Equity Fund

Portfolio Managers Patrick Kelly and Dr. Ankur Crawford construct this "best ideas" portfolio of approximately 50 stocks consisting of companies undergoing Positive Dynamic Change.

Performance is net of fees and expenses.

Fred Alger Management, LLC has contractually agreed to waive and/or reimburse Fund expenses (excluding custody fees, acquired fund fees and expenses, dividend expense on short sales, net borrowing costs, interest, taxes, brokerage expenses, fees in connection with ReFlow Fund, LLC liquidity program, extraordinary expenses, and certain proxy expenses to the extent applicable) through October 31, 2027 to the extent necessary to limit the other expenses and any other applicable share class-specific expense of Class Y to 0.06% and Class Z to 0.11% of the class's average daily net assets.This expense reimbursement may only be amended or terminated prior to its expiration date by agreement between Fred Alger Management, LLC and the Fund's Board of Trustees, and will terminate automatically in the event of termination of the Investment Advisory Agreement. Fred Alger Management, LLC may recoup any fees waived or expenses reimbursed pursuant to the contract; however, the Fund will only make repayments to Fred Alger Management, LLC if such repayment does not cause the Fund's expense ratio after the repayment is taken into account, to exceed both (i) the expense cap in place at the time such amounts were waived or reimbursed, and (ii) the Fund's current expense cap. Such recoupment is limited to two years from the date the amount is initially waived or reimbursed.

Only periods greater than 12 months are annualized.

The performance data quoted represents past performance, which is not an indication or a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. Performance figures assume all distributions are reinvested. Returns with sales charges reflect a maximum front-end sales charge on Class A Shares of 5.25%. Class A shares may be subject to a maximum deferred sales charge of 1.00%. For performance current to the most recent month end, visit www.alger.com or call 800.992.3863.

Alger AI Enablers & Adopters ETF (ALAI)

Portfolio Manager Patrick Kelly, CFA, believes that AI is a massive total addressable market, and he seeks to invest in companies actively involved in developing and implementing AI technologies.

Performance shown is net of fees and expenses.

Fred Alger Management, LLC has contractually agreed to waive and/or reimburse expenses (excluding acquired fund fees and expenses, dividend expense on short sales, net borrowing costs, interest, taxes, brokerage and extraordinary expenses, to the extent applicable) through December 31, 2027 to the extent necessary to limit other expenses of the Fund to 0.10% of the Fund's average daily net assets. This expense reimbursement may only be amended or terminated prior to its expiration date by agreement between Fred Alger Management, LLC and the Fund's Board of Trustees, and will terminate automatically in the event of termination of the Investment Management Agreement. Fred Alger Management, LLC may recoup any fees waived or expenses reimbursed pursuant to the contract; however, the Fund will only make repayments to Fred Alger Management, LLC if such repayment does not cause the Fund's expense ratio after the repayment is taken into account, to exceed both (i) the expense cap in place at the time such amounts were waived or reimbursed, and (ii) the Fund's current expense cap. Such recoupment is limited to two years from the date the amount is initially waived or reimbursed.

Only periods greater than 12 months are annualized.

Performance data quoted represents past performance and is no guarantee of future results. DUE TO MARKET VOLATILITY, CURRENT PERFORMANCE MAY BE DIFFERENT THAN THE FIGURES SHOWN. Investment return and principal value will fluctuate so that an investor's shares, when sold in the secondary market, may be worth more or less than original cost. Returns less than one year are not annualized. Performance does not reflect the deduction of commissions, which a broker may charge to execute a transaction in Fund shares, and an investor may incur the cost of the spread between the price at which a dealer will buy shares and the price at which a dealer will sell shares. Market performance is determined using the official closing price on the New York Stock Exchange. Market performance does not represent the returns you would receive if you traded shares at other times. To obtain performance data current to the most recent month end, please visit www.alger.com. Index performance does not represent the fund's performance. Investors may not invest directly in an index.

The views expressed are the views of Fred Alger Management, LLC ("FAM") and its affiliates as of September 2026. These views are subject to change at any time and may not represent the views of all portfolio management teams. These views should not be interpreted as a guarantee of the future performance of the markets, any security or any funds managed by FAM. These views are not meant to provide investment advice and should not be considered a recommendation to purchase or sell securities.

Risk Disclosures: Investing in the stock market involves risks, including the potential loss of principal. Growth stocks may be more volatile than other stocks as their prices tend to be higher in relation to their companies' earnings and may be more sensitive to market, political, and economic developments. A significant portion of assets may be invested in securities of companies in related sectors, and may be similarly affected by economic, political, or market events and conditions and may be more vulnerable to unfavorable sector developments. A significant portion of assets will be concentrated in securities in related industries, and may be similarly affected by adverse developments and price movements in such industries. Private placements are offerings of a company's securities not registered with the SEC and not offered to the public, for which limited information may be available. Such investments are generally considered to be illiquid. Foreign securities involve special risks including currency fluctuations, inefficient trading, political and economic instability, and increased volatility. Assets may be focused in a small number of holdings, making them susceptible to risks associated with a single economic, political or regulatory event than a more diversified portfolio. Active trading may increase transaction costs, brokerage commissions, and taxes, which can lower the return on investment. Investing in companies of small and medium capitalizations involves the risk that such issuers may have limited product lines or financial resources, lack management depth, or have limited liquidity. At times, cash may be a larger position in the portfolio and may underperform relative to equity securities.

Alger Focus Equity Fund, Alger AI Enablers & Adopters ETF and Alger Concentrated Equity ETF are classified as "non-diversified funds" under federal securities laws because they can invest in fewer individual companies than a diversified fund. ETF shares are based on market price rather than net asset value ("NAV"), as a result, shares may trade at a price greater than NAV (a premium) or less than NAV (a discount). The Fund may also incur brokerage commissions, as well as the cost of the bid/ask spread, when purchase or selling ETF shares. The Fund faces numerous market trading risks, including the potential lack of an active market for Fund shares, losses from trading in secondary markets, periods of high volatility and disruption in the creation and/or redemption process of the Fund. Any of these factors, among others, may lead to the Fund's shares trading at a premium or discount to NAV. Thus, you may pay more (or less) than NAV when you buy shares of the Fund in the secondary market, and you may receive less (or more) than NAV when you sell those shares in the secondary market. The Manager cannot predict whether shares will trade above (premium), below (discount) or at NAV. The Fund may effect its creations and redemptions for cash, rather than for in-kind securities. Therefore, it may be required to sell portfolio securities and subsequently recognize gains on such sales that the Fund might not have recognized if it were to distribute portfolio securities in-kind. As such, investments in Fund shares may be less tax-efficient than an investment in an ETF that distributes portfolio securities entirely in-kind. Brokerage fees and taxes will be higher than if the Fund sold and redeemed shares in-kind. Certain shareholders, including other funds advised by the Manager or an affiliate of the Manager, may from time to time own a substantial amount of the shares of the Fund. Redemptions by large shareholders could have a significant negative impact on the Fund.

Prior to August 1, 2025, the Alger Focus Equity Fund operated as a diversified company.

Companies involved in, or exposed to, AI-related businesses may have limited product lines, markets, financial resources or personnel as they face intense competition and potentially rapid product obsolescence, and many depend significantly on retaining and growing their consumer base. These companies may be substantially exposed to the market and business risks of other industries or sectors, and may be adversely affected by negative developments impacting those companies, industries or sectors, as well as by loss or impairment of intellectual property rights or misappropriation of their technology. Companies that utilize AI could face reputational harm, competitive harm, and legal liability, and/or an adverse effect on business operations as content, analyses, or recommendations that AI applications produce may be deficient, inaccurate, biased, misleading or incomplete, may lead to errors, and may be used in negligent or criminal ways. AI technology could face increasing regulatory scrutiny in the future, which may limit the development of this technology and impede the future growth. AI companies, especially smaller companies, tend to be more volatile than companies that do not rely heavily on technology.

S&P 500® Index: An index of large company stocks considered to be representative of the U.S. stock market. Russell 1000® Growth Index: Measures the performance of the large-cap growth segment of the U.S. equity universe.

The indices presented are provided for illustrative purposes, reflect the reinvestment of dividends and do not assess fees and expenses that would have the effect of reducing returns. Investors cannot invest directly in any index. The index performance does not represent the returns of any portfolio advised by Fred Alger Management, LLC and actual client results might differ materially than the indices shown. **Past performance is no guarantee of future results.**

Alger pays compensation to third party marketers to sell various strategies to prospective investors.

To be considered an "Investor's Business Daily Best Mutual Fund," a fund had to outperform the S&P 500 over the past one-, three-, five-, and 10-year periods as of 12/31/25. Alger Focus Equity Fund (Class I) was recognized in three categories: Growth Stock Funds (out of 536 funds); Large-Cap Stock Funds (out of 659 funds); and U.S. Diversified Stock (out of 1,246 funds). Alger did not pay a fee to be included in this ranking but does pay a licensing fee for use of the 2026 IBD Best Mutual Funds logo.

The LSEG Lipper Fund Awards are based on the Lipper Leader for Consistent Return rating, which is a risk-adjusted performance measure calculated over 36, 60 and 120 months. The fund with the highest Lipper Leader for Consistent Return (Effective Return) value in each eligible classification wins the LSEG Lipper Fund Award. Alger Focus Equity Fund (Class Y) won for Large-Cap Growth Funds category for 3-years (out of 163 funds) and 5-years (out of 161 funds) for the periods ended 12/31/25. Alger did not pay a fee to be included in this ranking but does pay a licensing fee for use of the Lipper logo. From LSEG Lipper Fund Award © 2026 LSEG. All rights reserved. Used under license.Class I shares are an investment vehicle for institutional investors.

Morningstar percentile rankings are based on the total return percentile rank that includes reinvested dividends and capital gains (excluding sales charge) within each Morningstar Category. The highest (or most favorable) percentile rank is 1 and the lowest (or least favorable) percentile rank is 100. If sales charges were included, performance would be lower and the rank may be lower.

Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating may differ among share classes of a mutual fund as a result of different sales loads and/or expense structures. It may be based in part, on the performance of a predecessor fund. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. Alger Focus Equity Fund A, I, Y, and Z were rated 5, 5,5 and 5 Star(s) for the 3-, 5-, and 10- year periods among 965, 914, and 744 Large Growth funds as of 9/30/26.

Rankings and ratings may be based in part on the performance of a predecessor fund or share class and are calculated by Morningstar using a performance calculation methodology that differs from that used by Fred Alger Management, LLC's. Differences in the methodologies may lead to variances in calculating total performance returns, in some cases this variance may be significant, thereby potentially affecting the rating/ranking of the Fund(s). When an expense waiver is in effect, it may have a material effect on the total return or yield, and therefore the rating/ranking for the period.

The Morningstar Medalist Rating ™ is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three fundamental pillars (People, Parent, and Process) and the Medalist Rating Price Score, which forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they are assigned. Pillar ratings take the form of Low (2), Below Average (1), Average (0), Above Average (+1), and High (+2). Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. The cost of an investment product is evaluated using the Medalist Rating Price Score, which is a continuous score running from negative 2.5 to positive 2.5 based on the percentile rank of a vehicle's expense ratio within its Morningstar Category. Morningstar combines the pillar scores and Medalist Rating Price Score using predetermined weights for actively and passively managed vehicles to calculate a weighted score. The weighted score is then compared to a set of fixed numeric thresholds employed consistently across Morningstar Categories and regions, with separate thresholds for actively and passively managed investments. Rating thresholds are reviewed at least annually. Buffers and ratings caps are employed to prevent frequent ratings changes. When analysts directly cover a vehicle, they assign the fundamental pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them approximately once a year. When vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about the Medalist Ratings, including their methodology, please visit: http://global.morningstar.com/managerdisclosures. The Morningstar Medalist Ratings are not statements of fact, nor are they credit or risk ratings. The Morningstar Medalist Rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks and uncertainties which may cause expectations not to occur or to differ significantly from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions or models when determined algorithmically, (iv) involve the risk that the return target will not be met due to such things as unforeseen changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, tax rates, exchange rate changes, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product. A change in the fundamental factors underlying the Morningstar Medalist Rating can mean that the rating is subsequently no longer accurate.

A subscription fee is paid to Morningstar to access research, ratings, rankings and other investment tools.

Before investing, carefully consider a Fund's investment objective, risks, charges, and expenses.
